

Residents living on the North side of 6th Ave NE and East of Broadway are allowed back to their homes during the hours of 8 am to 10 pm, beginning Wednesday morning. Do not use sewer or water in the NE Evacuation Zones and keep your sewers plugged.

People must have an ID on them showing their address. Residents will have to use 3rd Street NE to gain access.

If residents see any water in their homes, they should call Xcel Energy (1-800-895-4999) to disconnect electric service before entering. It is important to de-energize the electrical system to prevent safety incidents. Xcel vehicles will be in this area.

People should not enter any area that has water standing as the City's electrical system is still energized and dangerous.

We will continue monitoring all other evacuation zones for re-entry as the river level permits.
