6.5. CHANGE ORDER #1, DRAINAGE & STORMWATER IMPROVEMENT (AIR066)

In February 2018, the Airport's Wildlife Hazard Management Plan (WHMP) was revised and approved by the FAA. The design was delayed in Fall 2019 when it was discovered that an underground Enbridge pipeline would impact a portion of proposed ditch modifications and realignment. The Airport has been working with Enbridge since that time to find an amenable solution that addresses the drainage problem but still provides acceptable ground cover for the pipeline. The change order being requested accounts for costs of hydrovac potholing that was performed to determine the exact depth and location of the pipeline on-airport and the engineering fees required to redesign that section of the ditch improvements.

- 1. Recommend that Council approve the attached change order for the ongoing Drainage & Stormwater Improvement Project (AIR066); and**
- 2. Recommend that Council approve the attached budget amendment; and**
- 3. Authorize the Mayor to sign any applicable documentation.**

On July 20, 2020, City Council approved new lease terms for several other general aviation tenants of the Minot Airport, with the adjustment of some of the insurance requirements.
