Adoption Plan

how the plan will be executed

Project Management

payment, reporting, contract

Introduction

This scope of work is determined by the City of Minot to be carried out by Hometown Elegance Event Catering & Productions. Our company was founded December 2008 and officially opened for business here in Minot May 1, 2009. The company was founded on the principle that Minot Deserves Better. At the time, our focus was to provide our community with a better level of catering than existed. As time went on, the company changed from being a catering company to being a company that produces highly complicated events while also doing catering. Our focus has always been on the experience of the guests in attendance which has led us to being one of the most sought after producers in North Dakota. Our founder, Carl Clemetson, has personally completed over 3,200 events in his career. Events ranging from weddings, grand openings, general social or corporate events, to oil field and even international dignitary events have all been executed successfully. There isn't much in the world of events that really surprises us anymore which has allowed us to continue to push the envelope of what's possible to do in our community and region.

In addition, our founder and his family dealt with the flood directly. Their home prior to the flood was 209 3rd ST NW. An address now the home of the new pumping station on Broadway. The Clemetson family spent 108 days living in room 108 at River of Life Church in a 9'x 13' Sunday school room along with 70 other displaced people. The rawness of this tragedy is still real to this day.

It's this expertise and at producing highly complicated events and the personal experience that allow us to have the confidence in carrying out this scope of work that will lead to the moment where our community commemorates and remembers the day our community changed, not for the worst, but rose to become a better version of itself and, in the process learning from recovery the significance of resilience and its benefit to mitigating future disasters. Community that has found new meaning in the word restoration.

Overview and Objectives

The event is the 10th Anniversary and Commemoration of The Flood and the City's recovery experience as a learning process for resilience for mitigation with future disasters. This event will focus on community activities to draw our community together while blending in the formality of our dignitary roster as we commemorate the shared experience of our community and to draw our community together for a day of celebration to celebrate the good that has come to Minot since The Flood. To reflect on the tragedy that happened but focus on how Minot is better because of the changes that were spurred on by The Flood emphasizing the importance of the recovery work already accomplished and future work remaining to emphasize importance of mitigation and resilience measures. Minot has become a Phoenix. And while fortunately we didn't have to rise from the literal ashes as Grand Forks did, when the flood waters receded, Minot rose to the occasion both as a city but more importantly as a community.

The Objective of this event is to celebrate the work that has been done to highlight its significance in preparing for future disasters, reflect on what happened to emphasize lessons learned as emphasis on need for continued mitigation efforts, inform the community of what is coming, and connect our community with those who experience with those who did not promote an understanding that resilience and mitigation regardless of physical location in Minot is a community-wide effort of extreme importance.

Scope of Work

- Create Full Day Itinerary for all stakeholders at this event and coordinate with them to provide support for the day's events in consultation with the Mayor and to be approved by the Disaster Recovery Grand Administrator.
- Develop the second half of the day events to create a full day experience for our community with contingency plans for weather challenges in consultation with the Mayor and approved by the Disaster Recovery Grant Administrator.
- Conduct meetings with city fire and police services to ensure a safe and secure event for the public.
- Develop a site map for all aspects of the event.
- Develop a budget for the event including afternoon and evening entertainment to be approved by the Finance Director and the Disaster Recovery Grant Administrator.
- Manage the entire event from initial setup to full teardown.
- Conduct post mortem meetings with all stake holders to find ways to improve the event with the goal of potentially making the festivities and annual event should the city leadership deem that a goal.

Project Deliverables

- Digitally accessible timeline for all stakeholders mutually developed between the consultant and the City
- Written event budget to be measurable and consistent with the requirements of the CDBG-NDR Grant
- Hometown Elegance handling all Press related questions and inquiries Marketing strategy
- Additional entertainment for the rest of the day, subject to approval by the City and available funds
- Seamless, staffed coordination of the day
- Post mortem report of the event

Adoption Plan

The initial adoption step is for Hometown Elegance to begin with a meeting with city staff to establish the current state of the event planning process, to understand the parameters and requirements for compliance with HUD rules and regulation for use of CDBG-NDR funds, and review any elements that are in contract already. At that meeting, Hometown Elegance will present several ideas for filling the remaining portion of the day with activities in order to move forward with developing a full budget.

Upon completion of that step which includes and requires approval of the budget and planned activities by the Disaster Recovery Grant Administrator, a joint press release will be drafted and distributed to all press outlets to make sure they are engaged so that we have their support for bringing awareness of this event to the public. The goal is to direct all inquiries to Hometown Elegance so that nothing falls through the cracks.

It is expected that both Hometown Elegance and the City of Minot would use their social channels to engage the public.

Hometown Elegance will meet with Minot Park District, Minot Fire, Minot Police Department and Public Works to coordinate what services can be provided in house by the city to avoid additional costs for the event. In the event services cannot be provided in house, Hometown Elegance should work with the Disaster Recovery Grant Administrator to present recommendations to the City Council consistent with all local, state, and federal (including HUD) rules and regulations.

From here a full site map will be developed to ensure emergency services has access to the entire park; a contained bar zone to eliminate potential underage drinking (it is understood that no federal funds can directly or indirectly be involved with the offering or consumption of alcoholic beverages), and locations for the remaining activities of the day.

Finally, a digital timeline will be created so that all stakeholders and dignitaries have access and can make recommendations to it. The City through the Public Information Officer shall maintain all editing control of the timeline and digital timeline including approval of the initial timeline. A copy of the final timeline will be included in the post mortem report.

Project Management

Payments: All payments to be made with CDBG-NDR funds shall be for work already performed or demonstrated costs incurred, and consistent with specific contract provisions that are in compliance with all local, state, and federal (including HUD) rules and regulations.

Reporting: The City of Minot will establish a clear change of custody for signing off on final design of promotional material, t-shirts, and other event related products in a timely matter.

Terms: See below
