

## **Landfill Use/Financial Arrangements for Private Contractors - Addendum**

From: David Lakefield

I have approved this agenda item to be added to the Committee of the Whole meeting to get the discussion started. I would recommend approving a finance charge Citywide instead of just for commercial haulers at the landfill.

Finance is researching the capabilities of our financial software to see if there are any limitations that may prohibit the implementation of this finance charge. We are also researching any limitations that may be placed on the rate imposed.

I expect to have the required information in time for the meeting.

Please feel free to contact me with any questions.
